Software Engineer

GitHub: jaugustodafranca
LinkedIn: jaugustodafranca

I'm a software developer with experience in building robust and responsive web and mobile applications. I specialize in modern front-end frameworks and technologies. Throughout my career, I have contributed to projects across various industries, including home management, logistics, sports, education, and healthcare, working with companies worldwide. I am dedicated to delivering high-quality, scalable applications that offer an exceptional user experience.

EDUCATION

Bachelor's degree in Information Systems, *Federal University of Santa Catarina* — 01/2018 - 07/2022

SKILLS

Technical skills
React, Next, React Native, Typescript, Javascript, Redux, Mobx, Jest, REST API, GraphQL, styled-components, Material UI, Storybook, CI/CD

Communication
Portuguese (Native) and English

WORK EXPERIENCE

Software Engineer — Mar 2022 — Present
AvantStay — *Remote - LA, United States*

As part of Avantstay's operations team, I develop and maintain internal systems that streamline key services like cleaning, maintenance, and guest support for home bookings. I build features for our web platform and support a mobile app used by field teams and vendors. Additionally, I collaborate with other teams on the main website and systems for homeowners.

Software Engineer — Oct 2021 — Mar 2022
Popstand — *Remote - LA, United States*

At Popstand, I led the development of an NFT marketplace on the Flow Blockchain, collaborating with the client's team to deliver new features and ensure smooth NFT launches. I also participated in client meetings to gather feedback, present updates, and supported developers with project challenges.

Software Engineer — Jul 2020 — Oct 2021
JungleDevs — *Florianópolis, Brazil*

Jungle Devs, now rebranded as Olby, was a software house where I developed tailored solutions to meet the unique needs of clients across various industries. I collaborated with cross-functional teams to design intuitive, high-performance interfaces, ensuring seamless user experiences. Additionally, I mentored fellow developers, offering guidance on best practices and solving technical challenges, which boosted team productivity and improved project outcomes.

Software Engineer Intern — Jul 2019 — Jun 2020
JungleDevs — *Florianópolis, Brazil*

I was an intern at JungleDevs, participating in the Academy internship program, designed to cultivate new talent in software development. Throughout the program, I focused on the frontend stack, studying key frameworks and market patterns. Additionally, I had the opportunity to collaborate on real client projects, where I applied the knowledge and skills I gained during the internship.

Software Developer Intern — Aug 2018 — Jun 2019
Federal University of Santa Catarina — *Florianópolis, Brazil*

I was involved in the initial stages of developing a new academic system for university students and staff. As fullstack developers, we worked with Ruby on Rails for the backend and Vue.js for the frontend

ACHIEVEMENTS

• Contributed to the NFL NFT Marketplace as part of a project for one of Popstand's client.

• Implemented end-to-end testing in client projects at JungleDevs, significantly reducing the number of issues.
